FOCUS

Robotics
Computer vision
Industrial automation
Robot-camera systems

SKILLS

Programming & Robotics

- Python
- C++
- ROS
- TIA Portal
- RobotStudio

Tools

- OpenCV
- Open3D
- NumPy
- Version control

Industrial Automation

- Siemens PLCs
- ABB robots
- Robot-camera systems
- Robotic cells

Languages

- Slovene
- English
- Dutch
- Serbo-Croatian
- German

Lenart Lavrih

Robotics specialist / Engineer

Robotics • Computer Vision • Industrial Automation

PROFILE

Robotics and automation engineer with hands-on experience in industrial robot cells, computer vision, ROS/ROS2, Siemens PLCs, ABB robots, and robot-camera systems. Experienced in preparing PLC and robot software for machines integrated into production lines, including software development, factory testing, commissioning support, and on-site troubleshooting. Comfortable working closely with hardware, electrical, and mechanical engineers to optimize machine behavior, EPLAN documentation, robotic tooling, and system performance.

WORK EXPERIENCE

Robotics Specialist

Apr 2024 – present

Royal Kaak, Netherlands

- Prepare and test PLC and robot software for food-industry machines integrated into automated production lines.
- Work with Siemens PLCs, ABB robots, robotic cells, and robot-camera systems.
- Support factory testing, machine debugging, commissioning preparation, and on-site troubleshooting.
- Collaborate with hardware, electrical, and mechanical engineers to optimize EPLAN documentation, robotic tools, and machine behavior.
- Contribute to the integration of software, vision systems, PLC logic, and robotic motion into reliable industrial automation solutions.

ROS Developer

Oct 2023 – Dec 2023

IHS Systems, Slovenia

- Developed ROS-based software components for an autonomous robot.
- Worked on robotic perception, system integration, and testing of robot behavior.

ROS Developer Intern

Oct 2022 – Sep 2023

IHS Systems, Slovenia

- Developed and tested computer vision components for an autonomous robot.
- Worked with perception-related development, image processing, and robot-environment interaction.
- Supported testing and validation of vision functionality in practical robotic scenarios.

Robotics Software Intern

Jun 2021 – Oct 2022

RLS Merilna tehnika d. o. o., Slovenia

- Developed a ROS2 framework for a custom robotic platform.
- Worked on software structure, robot communication, and integration of system components.

- Gained practical experience with ROS2-based robotic software development.

EDUCATION

Master's degree in Robotics

2021 – 2023

University of Ljubljana, Faculty of Electrical Engineering

Bachelor's degree in Automation

2018 – 2021

University of Ljubljana, Faculty of Electrical Engineering

SELECTED ACHIEVEMENTS

- Third prize for an article on autonomous robotics.
- Third prize in a nutritional programming competition.

STRENGTHS

- Practical problem-solving in robotics and automation.
- Experience connecting software, vision systems, PLCs, and robots.
- Comfortable working in multidisciplinary and international engineering environments.
- Strong motivation for endurance, consistency, and long-term improvement.
